GENERAL DATA

Truck Capacities Capacity at different load centres

Note:

The listed capacities are valid only for the standard upright in vertical position with standard fork carriage and standard forks, up to max. lifting height of 3300 mm. The centre of gravity of the load may be displaced by max. 100 mm against the longitudinal centre plane of the truck. Load centre is determined from top and front face of the forks. The values are based on a 1000 mm cube load configuration with the centre of gravity at the true centre of the cube with upright tilted forward lower capacity values are valid. Attachments, longer forks, exceptional load dimensions and higher lifting heights can reduce the capacity.

Please talk to your CLARK dealer if you require further information.

PRODUCT DESCRIPTION

The CLARK electric forklift trucks in the SE25-35 series offer performance, safety and ergonomics. The electric counterbalance trucks keep your logistics moving - without harmful emissions. With our advanced SMART display, which informs the operator of all important driving parameters, the two powerful, low-noise drive motors and a design that is built to last, the SE25-35 represents the next generation of electric forklift trucks.

Lithium-ion technology

Thanks to fast charging times, the SE25-35 electric forklift trucks with lithium-ion battery (Li-Ion) can be used almost without interruption. The CLARK Li-ion battery with 80 volts and 560 Ah is available in two battery tray sizes and can be used for both wheelbases (battery compartments). The charger with 80 volts, 120 A requires a high-voltage connection (CEE 16 A plug). The charging status of the Li-ion battery is shown on the vehicle display. The battery management system (BMS) has a safety cut-out and thus ensures safe use of the battery. Possible error codes of the BMS are also shown on the vehicle display.

Driver's workplace

- Ergonomic driver's workplace that offers plenty of legroom
- Minimal vibrations
- Non-slip metal step (step height: 420 mm)
- Non-slip foot area
- Large grab handle on the driver's side makes getting on and off easier
- Adjustable steering column for more leg and foot room
- Small steering wheel diameter ($\varnothing = 300$ mm)
- Hydraulic power steering
- Adjustable seats with mechanical or air suspension
- Hydraulic control via lever on the bonnet or electronic hydraulic control via mini levers
- Ergonomically arranged drive and brake pedals
- Low front panelling for optimum visibility
- Very good mast visibility due to double primary cylinders
- Cup holder, storage box and document holder with optional 12 V power connection or USB charging connection

Smart display

- Clear, easy-to-read 5-inch colour display
- Splash-proof
- Maintenance display and password-protected service access
- Customisable driving behaviour (including adjustable acceleration, electric braking behaviour and speed reduction when cornering)

Drive and control

Traction motors:

- Two powerful AC motors, each with 9.0 kW and 80 volt three phase technology
- Automatic protection: The motor power is automatically reduced to protect components from overheating.
- ZAPI DUAL AC control unit is protected in the counterweight.

Steering system

- Hydrostatic power steering
- Robust steering axle with 101° steering angle
- Automatically engaging, electric parking brake with roll-back protection on inclines and ramps
- Maintenance-free, wet multi-disc brake

Hydraulic system

- Large hydraulic oil tank ensures that there is always enough hydraulic oil for all mast and attachment types
- Full-flow return filter filters the oil every time it returns to the tank. Coarse particles are filtered directly via a suction filter and therefore do not enter the oil circuit. This ensures a long service life for all hydraulic components.

Lift mast

- The clear-view masts are available in Standard, Hilo and Triplex versions
- Very good visibility
- Double primary cylinders
- CLARK mast damping absorbs shocks during the transition between the individual mast stages
- Robust 6-roller fork carriage with adjustable side support rollers for long service life

Additional standard equipment

- Headlights (LED)
- SE tyres
- Indicators, rear combination light with brake light and white rear light (LED).
- Paintwork in bright safety colour „CLARK HOT YELLOW GREEN“
- Canopy and mast in matt black, rims in gloss black

Additional options

- Non-creeping SE tyres
- Cab variants
- Rain protection (PVC roof)
- Weather protection (steel roof and windscreen)
- Partial cab (steel roof, front and rear windscreen)
- Full cab
- Mini levers integrated in the armrest with direction of travel switch
- Direction of travel switch on the mechanical hydraulic lever
- Integrated or hook type sideshift
- Fork positioner
- Lateral battery change using a hand pallet truck (only for SE30/ SE35)
- Reversing camera
- 12 volt power connection
- USB charging connection
- Blue safety light as visual reversing warning
- Load weight indicator
- CLARK Vertical Mast System (VMS): When the function is activated, the tilting process of the mast stops automatically in a vertical position
- Various seats with armrest or side support bar
- Quick-release couplings
- Acoustic reversing alarm

Safety

The SE-Series is CE-certified and complies with all European safety standards. Contact your local CLARK dealer to find the right configuration for your needs.
